WMA declaration of Delhi on health and climate change

Author(s): World Medical Association (WMA)

Year: 2010

Publisher: World Medical Association (WMA) (Ferney-Voltaire, France)

Abstract:

The purpose of this document is to provide a response by the WMA on behalf of its members to the challenges imposed on health and healthcare systems by climate change. Although governments and international organizations have the main responsibility for creating regulations and legislation to mitigate the effects of climate change and to help their populations adapt to it, the World Medical Association, on behalf of its national medical association members and their physician members, feels an obligation to highlight the health consequences of climate change and to suggest solutions. The 4th Assessment Report of the International Panel on Climate Change (IPCC) contains a full chapter on human health impacts (AR4 Chapter 8 Human Health1), including a range of possibilities regarding the potential effects of climate change. The following introduction includes the most likely effects of climate change from the IPCC report.

Resource Description

Communication: M

resource focus on research or methods on how to communicate or frame issues on climate change; surveys of attitudes, knowledge, beliefs about climate change

A focus of content

Communication Audience: M

audience to whom the resource is directed

Health Professional, Public

Exposure: M

weather or climate related pathway by which climate change affects health

Unspecified Exposure

Geographic Feature: M

resource focuses on specific type of geography

None or Unspecified

Climate Change and Human Health Literature Portal

Geographic Location: **☑**

resource focuses on specific location

Global or Unspecified

Health Impact: M

specification of health effect or disease related to climate change exposure

General Health Impact

Medical Community Engagement:

resource focus on how the medical community discusses or acts to address health impacts of climate change

A focus of content

Mitigation/Adaptation: **☑**

mitigation or adaptation strategy is a focus of resource

Adaptation, Mitigation

Model/Methodology: **☑**

type of model used or methodology development is a focus of resource

Exposure Change Prediction

Resource Type: M

format or standard characteristic of resource

Policy/Opinion

Resilience: M

capacity of an individual, community, or institution to dynamically and effectively respond or adapt to shifting climate impact circumstances while continuing to function

A focus of content

Timescale: M

time period studied

Long-Term (>50 years)
